

AIRplus® cushions, PAPERplus® cushions and COMFORT.PACK Stations

INCREASED WORKING COMFORT AND THROUGHPUT

Carraro Driveservice located in Poggiofiorito, Italy, is a key partner for major manufacturers of agricultural and construction equipment. Its mission is to improve the quality of life and work of farmers.

Carraro manufactures transmission systems for tractors and off-highway vehicles. The company's portfolio covers everything from the smallest transmission to a complete tractor.

Since 2018 Carraro Driveservice has been a strategic logistics center which stores all Carraro spare parts.

PRODUCTS: Axles, transmissions, spare parts for tractors and construction equipment

SCOPE: COMFORT.PACK Stations
AIRplus® cushions
PAPERplus® cushions

CHALLENGE - INCREASE Working Comfort®

Carraro Driveservice has been a long-term customer of Storopack using AIRplus® and PAPERplus® cushions. As they were moving their warehouse of spare parts, Carraro Driveservice converted their production plant into a logistics plant. Since the original tables were no longer suitable for the packing process, Carraro Driveservice reached out to Storopack in order to improve the Working Comfort® of the employee environment and increase throughput.

SOLUTION - COMFORT.PACK STATIONS

Storopack's Working Comfort® module COMFORT.PACK means ergonomically designed packing stations that combine all essentials that are important for the packing process - from cartons and consumables to tools and mounts for hardware such as scanners or monitors.

COMFORT.PACK can be implemented in an existing process and used as an element in the customer's intralogistics. Additionally, it can be combined with other Working Comfort® elements in order to further optimize processes that occur both before and after the product is packed.

With an ergonomically designed pack station equipped with customized carton dividers, adjustable screen, keyboard holder and dimmable lighting, Storopack was able to support Carraro Driveservice in improving their packing process. The carton dividers as well as the drawers and the table edge come in the color of Carraro Driveservice and feature their logo. The packing table is also equipped with electrical height

adjustment which allows perfect adaptation to the height of the employees and makes Working Comfort® possible. In addition to COMFORT.PACK, Storopack also offers the modules for erecting boxes (COMFORT.ERECT), applying protective packaging (COMFORT.PROTECT) and case sealing (COMFORT.CLOSE).

With these Working Comfort® modules, Storopack has all stages of the packaging process covered. With a full range of customizable options, they can be tailored to your unique requirements.

RESULT - HEIGHTENED ERGONOMICS, INCREASED COMFORT

Thanks to Storopack, Carraro can offer its employees an ergonomic workspace due to automated height adjustment of the packing table and an improved and comfortable working environment. As a result, throughput increased as well as overall efficiency of the packing process.

STOROPACK - PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

ALL BASES COVERED

We at Storopack would like to offer our customers the very best, which is why we set great store by the ability to listen, comprehensive consulting, and long-term services across all sectors.
